

# Thermoregulation

# VINIPOCKET

There is much more to the VINIPOCKET regulation cabinets designed by Lamouroux than regulating fermentation temperatures.

These aesthetic, practical, efficient tools are suited to all kinds of users, thanks to a wide range of standard configurations capable of managing all types of production.

VINIPOCKET cabinets have a large number of advantages:

### ■ An extensive range

An extensive range giving users the choice between polyester, stainless-steel or steel cabinets, as well as customised colour models to fit into the design of the vat room.

A special feature of our cabinets is that they can control all types of actuator: electric, pneumatic or motorised.

### ■ A clear, innovative interface

The orders entered by the user are transmitted from the PDA to the cabinet via a wireless Bluetooth link (100m range).

With this new mobile interface, the temperature, selected programme and instructions are all displayed on the PDA... and can be modified directly; from anywhere in the winerie.

The front panel of the cabinet displays the parameters and temperature reading.

### ■ Computer-controlled

RS485 bus link.  
Remote web connection.  
Supervision software.

## Performance, aesthetics and build quality guaranteed

### ■ The right price

As the number of boards corresponds to the number of vats, these cabinets adapt to every need, from the smallest to the largest.

**Electro Magnetic  
Compatibility**

## Thermoregulation

### ■ The Regulator

Watertight casing.

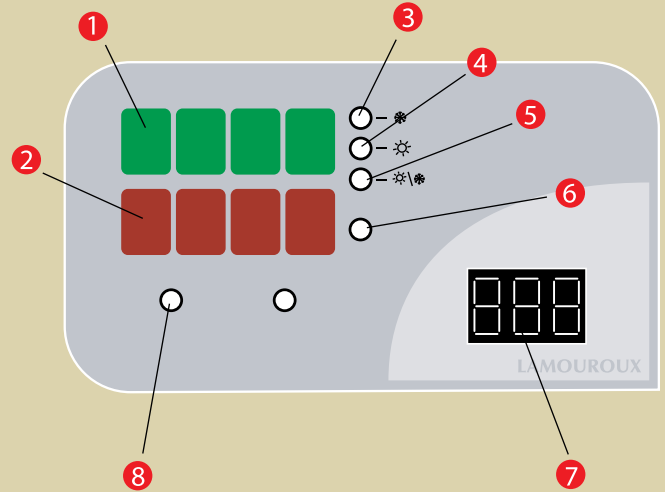

Each vat is controlled by an individual regulation board.

For easier maintenance, the boards are plugged into a rack. The terminal blocks can be unplugged for easier wiring.

The pneumatic distribution version features pre-wiring with a ribbon cable link and HE10 connection.

P1000 probe with aluminium connection head.

### Control Panel Indications

- 1 Temperature and density display
- 2 Instruction and density display
- 3 Refrigeration programme lamp
- 4 Heating programme lamp
- 5 Mixed programme lamp
- 6 Actuator status lamp
- 7 Vat number display
- 8 Alarm lamp

Electro Magnetic  
Compatibility
